# Leaders in LED Technology

Visionaire Lighting is an industry leader with more than 15 years of experience transforming automotive dealerships with high-performance lighting design, one-of-a-kind optics, and modern energy saving LED technology. Visionaire fixtures feature cutting edge LED optics specifically designed for dealership lighting. Whether designing a custom retrofit project or managing new construction, Visionaire Lighting provides state-of-the-art technology and architectural styling for reliable results and superior customer satisfaction.

Visionaire Lighting manufactures specification-grade LED outdoor lighting fixtures & poles. We specialize in Automotive Dealership Lighting, and have unique patented optical systems that are designed exclusively for the Automotive Dealership Market.

Visionaire is always advancing its LED technology, and has enhanced capabilities in design, testing, manufacturing, and quality assurance.

Visionaire Lighting's Design and Applications Department utilizes cutting edge technology to provide our customers with complete engineering assistance and site-specific photometrics to layout your site perfectly and ensure complete satisfaction.

Please visit [www.visionairelighting.com](http://www.visionairelighting.com) for an overview of our complete line of outdoor lighting products.

# Project: Chino Hills Ford

VLX LED Luminaire

## Case Study

Increased Light Levels & Uniformity

### Project Description

In late 2014, The Chino Hills Ford dealership had just finished a major repositioning and facelift managed by Sauers Lopez Construction (SLC). SLC turned to Visionaire Lighting to perform an evaluation of the site lighting and recommend solutions to both modernize the site lighting and reduce the customer's operating costs.

"Visionaire was with us through the entire process. Their product allowed us to significantly reduce the total fixture quantity all while improving the overall site lighting quality. This reduction in fixtures and improved technology really drove the project financially. The customer saved money and procured a significant rebate to make the investment a win-win" said Clark Longhurst, President of Monterey Energy Inc.

### Summary

- VLX fixtures
- Replaced 151 fixtures total
- 42% overall fixture count reduction

### Benefits

- 78% reduction in lighting energy costs
- \$2,500.00 in reduced annual maintenance costs
- \$42,100.00 – rebate received from utility
- 62.3% - customer's return on investment (ROI)
- \$628,629.00 – 10 year cash flow improvement
- 428 tons of CO2 reduced, enough to power 47 homes annually

# Project: Duval Acura

BLX-III LED Luminaire

## Case Study Incentive & Lighting Upgrade

### Project Description

Duval Acura was looking for a lighting upgrade to help them stand out, cut down on energy and draw in more clientele. After evaluation we knew just the cost effective solution that would return their ROI in energy savings and convert to higher sales.

Duval Acura changed out a total of 220 1000W HID fixtures and 32 400W floods. Using one of our highest performing and energy efficient LED luminaires, the BLX-III, we were able to replace quads with doubles and doubles with singles cutting down overall fixture count by 57% and the wattage by 74%. Duval Acura received a rebate of \$26,000 reducing cost and resulting in better lighting, more sales and reduced annual energy.

### Summary

- Replaced with BLX-III fixtures
- 55% fixture count reduction
- Reduced wattage by 74%

### Benefits

- \$26,000 JEA rebate
- Brighter lumen package
- Annual increase in sales

# Project: Morton Grove Audi

VLX LED Luminaire

## Case Study Maintenance & Incentive

### Project Description

When buying a car at McGrath Audi; a premier dealership in Chicago, not only are you buying excellence in a car, you are visiting a pristine automotive dealership. When renovating their lot, McGrath needed an LED fixture that was as aesthetically pleasing as the cars it was showing off. And of course the best fixture for the Job was our VLX.

McGrath changed out 101 fixtures from 1000 Watt Pulse Start, to 359 Watt Led Fixtures that included wireless controls, saving them 721 Watts per fixture. This 66% power reduction qualified McGrath for an utility incentive return of \$36,360 in total. Now, this product gives more light with less power as well as saving thousands of dollars in maintenance spending.

### Summary

- VLX fixtures
- Replaced 101 fixtures total
- Replaced 1000 watt fixture with 359 watt LED fixtures

### Benefits

- \$36,360 incentive return for power reduction
- Wireless controls for added control and savings
- Now saving thousands of dollars annually on maintenance

# Project: Oxnard Lexus

BLX-III LED Luminaire

## Case Study Incentive & Lighting Upgrade

### Project Description

On a street strewn with dealerships, Oxnard Lexus wanted a fixture that would help them stand out among the rest. Not only did they want to look brighter and newer, they wanted to save energy while also qualify for the utilities incentive program. Worried about sacrificing light for energy savings, they came to us with questions. We answered with the BLX-III.

In total 81 fixtures were changed. Replacing 1000 Watt HID fixtures with 614 Watt LED fixtures on the sales lot, and 444 Watt LED fixtures on the service lot. In doing so, Oxnard Lexus qualified for over \$20,000 in utility incentive rebates. In addition they are now saving an estimated \$37,672.56 annually in energy spending as well as thousands of dollars in maintenance.

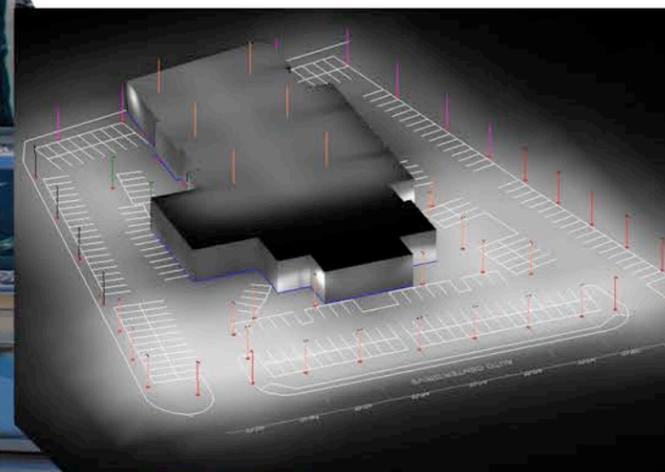

### Summary

- BLX-III Fixtures
- Replaced 81 fixtures
- Replaced 1000 watt HID with 614 watt & 444 watt LED fixtures

### Benefits

- Over \$20,000 in utility incentive rebates
- Almost \$38,000 in annual energy spending
- Thousands saved in annual maintenance

# Project: Elgin Honda

VLX LED Luminaire

## Case Study New Construction

### Project Description

Elgin Honda of Illinois being new construction had a plethora of options when designing their lot. After deciding how the lot would be laid out, Elgin came to us wanting the most light with the least amount of fixtures, while still being able to emit the necessary lumens during the snowy weather months. They wanted to maximize efficiency, leave more space for their large inventory of cars, while being able to control the light during bad weather so they could always be seen from the road.

Our internal team of photometric specialist's was able to design a lot tailored to do just this using our VLX. Using our patented optics we were able to cut out almost half of the fixtures Elgin thought they would need with HID lighting. The layout offered them the fewest fixtures while giving them an immensely large Lumen output, while also working with our controls team to design controls for greater adjust-ability. Now, come rain, snow or nightfall, Elgin Honda now has the power to be seen at all times of the day as well as all times of the year.

### Summary

- VLX fixtures
- 101 LED fixtures under 350 watts
- Wireless controls

### Benefits

- Half as many fixtures for more lumens
- Initial installation savings
- Maintenance & power savings
- Wireless controls make bad weather less significant on sales

# Project: Devoe Subaru & Buick

BLX-III LED Luminaire

## Case Study Lighting Upgrade

### Project Description

In deciding what lights should replace their existing HID fixtures, Devoe Subaru & Buick knew they had to find the best of the best. Located right in the heart of one of the most expensive cities in the United States, they know extra effort is required to attract attention to their lot. Being ahead of the curve was important to them, and we provided them with our newest and brightest fixture to hit the market, our BLX-III.

Replacing old 1000 Watt HID fixtures, with 564 Watt LED BLX-III fixtures we were able to give them a significantly brighter lot, while also reducing their power consumption by almost 50%. Although initially Devoe wasn't concerned with cost, they were able to achieve higher lumens than were expected with a fraction of the operational power previously consumed on the lot.

### Summary

- BLX fixtures
- Replaced 56 fixtures
- Replaced 1000 watt HID with 564 watt LED

### Benefits

- Brighter lumen package
- 47% drop in power consumption annually
- Annual sales increase since BLX installation

# Project: Morton Grove Acura

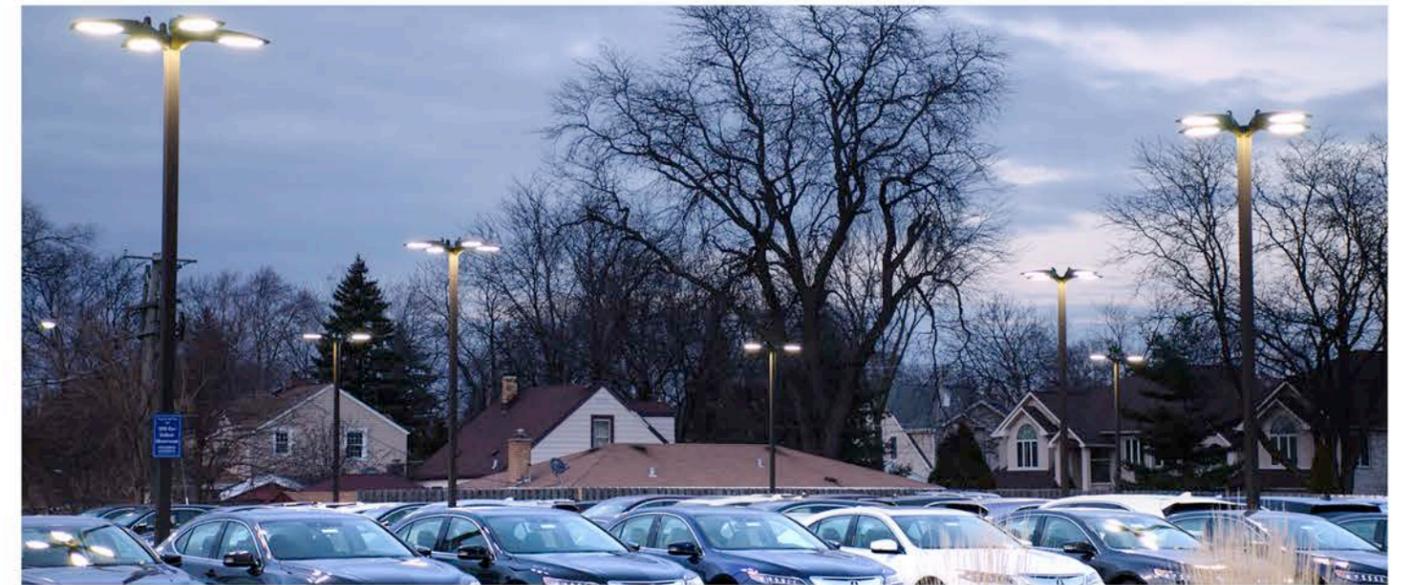

VLX LED Luminaire

## Case Study Maintenance & Incentive

### Project Description

Acura is among the top three rated cars in consumer reports. When renovating their lot, Morton Grove knew they needed a fixture that competed just as highly in the outdoor lighting world as their cars did in the automotive world. They knew when replacing the lights in their lot, the fixtures chosen needed to ensure that the Acuras on their lot looked a cut above the rest, while having the ability to be more energy efficient as well. After being introduced to our very sleek, energy efficient yet very powerful VLX, the choice was clear.

Replacing 72 fixtures that were previously 1000 Watt Pulse Start with new 359 Watt LED VLX fixtures, we were able to reduce their wattage usage by 721 Watts per fixture. This equates to a 66% energy savings overall. Such high-energy savings combined with added wireless controls, Morton Grove was able to qualify for a utilities incentive return of over \$24,000. Morton Grove saved money and energy while still creating a beautifully lit lot that helps the newly waxed cars shine that much brighter.

### Summary

- VLX fixtures
- Replaced 72 fixtures
- Replaced 1000W pulse start with 359W LED fixtures

### Benefits

- Over \$24,000 in utility rebates
- Reduced energy usage by 66%
- Wireless controls give more lighting control

# VLX-XL Array

## LED Luminaire

The new **VLX-XL Array LED** Series offers clean, functional styling that is defined by its sleek low profile design and rugged construction. It combines LED performance and advanced LED thermal management technology and provides outdoor lighting that is both energy efficient and aesthetically pleasing.

The **VLX-XL Array LED** Series is destined to become the standard for which LED area lights are measured. Simple flowing lines that house scalable LEDs that replace traditional HID fixtures for a wide range of lighting applications. From shopping centers to auto dealerships to general parking lots to roadways the VLX-XL Array LED series is the transition of LED lighting into tomorrow.

### Key Features:

- Die cast aluminum housing
- Separate driver compartment
- Ten specification-grade optics
- 3000K CCT, 4000K CCT and 5000K CCT
- 51,000 – 95,000+ Lumen package
- 120- 277 UNV Voltage Drivers, 347 & 480 Voltage Drivers
- 410 – 680 Wattage range
- Twist Lock Photocell and Receptacles
- Title 24 Compliant Motion Sensor
- 0-10V Dimming Driver
- Visionaire Wireless Controls
- Cut-off Shielding

# VLX-XL Array LED Specifications

Project Name:

Catalog Number:

Type:

The new **VLX-XL Array LED** Series offers clean, functional styling that is defined by its sleek low profile design and rugged construction. It combines the latest LED Array technology, advanced LED thermal management and provides outdoor lighting that is both energy efficient and aesthetically pleasing.

The LED Arrays performance and the driver's life are maximized by enclosing them in two separate die cast aluminum housings. Easy access for mounting and maintenance.

The VLX-XL Array LED fixture is offered with lumen packages ranging from 55,000 - 90,000. Choose between 3000, 4000 or 5000 Kelvin temperature of the LEDs.

A durable polyester powder coat finish is guaranteed for five years; and is available in standard or custom colors.

The **VLX-XL Array LED** series is an exceptional choice for commercial parking lots, office complexes, architectural projects, and other general lighting projects.

# VMX-II Array

## LED Luminaire

The new **VMX-II Array LED** Series offers clean, functional styling that is defined by its sleek low profile design and rugged construction. It combines LED performance and advanced LED thermal management technology and provides outdoor lighting that is both energy efficient and aesthetically pleasing.

### Key Features:

- Die-Cast aluminum housing
- IP65 Housing and LED optical assembly
- 1000 W Replacement
- 10 Specification Grade low glare optics
- 25,000 – 55,000 lumen packages
- 202 – 400 wattage range
- 120-277 universal Drivers, 347 & 480 voltage drivers
- 10KV Surge Protector
- 90% Power Factor
- 10 Year Electrical Warranty
- PangeaLink compatible
- Quick Mount Cleat
- Mounts to round or square pole
- 3, 5 and 7 Photocell receptacles
- 0-10V Dimming driver
- Title 24 Compliant Motion Sensor

# V-Sconce-II

## LED Luminaire

**VSC-II** – part of our V-Collection is a high performance architectural LED luminaire to be used in outdoor lighting applications. Sleek design takes advantage of the low profile LED lamp technology. Superior thermal management allows for maximum LPW output.

Cast aluminum construction provides years of reliable operation. A durable polyester powder coat finish is guaranteed for five years and is available in standard or custom colors.

Six different IES light distribution patterns make the VSC-II ideal for any site.

### Key Features:

- Cast Aluminum Housing
- Separate Driver Compartment
- T1, T2, T3, T4, Flood Narrow & Flood Medium Optics
- 3000K CCT, 4000K CCT and 5000K CCT
- 2,000 – 13,000+ Lumen package
- 120- 277 UNV Voltage Drivers, 347 & 480 Voltage Drivers
- 18 – 105 Wattage range
- Conduit Box with (2) 1/2" Threaded Conduit Holes
- Button Type Photocell
- Title 24 Compliant Motion Sensor
- 0-10V Dimming
- Emergency Battery Pack
- Back Plate for Retrofit applications
- Up-light configuration

## LED Luminaire

The BLX-III Array creates a 145,000+ lumen site lighting package for high light level LED applications. A dedicated heat sink for each LED array maximizes the thermal management characteristics of the BOW LX II Array. Multiple mounting options including an adjustable knuckle slip fits over a 2 3/8" tenon, and allows for up to 90 degrees of vertical adjustment in 10 degree increments from horizontal, as well as full side to side adjustment. A Bolt-On Arm that utilizes a 2 piece cleat system for easy installation. A Mast Arm Fitter that fits over a 2 3/8" tenon. A Post Top Mount that fits over a 2 3/8" tenon and is adjustable up to 45° and a Trunnion Mount that is adjustable up to 45°.

### Key Features:

- Die cast aluminum housing
- Integrated heat sink
- Field adjustable knuckle
- Quick Install
- 8 IES optic patterns
- 145,000+ lumen packages
- 3X, 4X, 6X or 8X LED Array design
- Ideal for Automotive and large site light projects

# BLX-III LED Specifications

BLX-III-4 Bolt-on Arm

Project Name: \_\_\_\_\_

Catalog Number: \_\_\_\_\_

Type: \_\_\_\_\_

The new **BOW LX-III LED** Series continues the unique contemporary design inspired by the sleek styling of the BOW family. Separating the extruded aluminum driver housing and the individual die-cast aluminum linear LED engines: optimize the life of the LEDs and the Driver(s); and maximizes the lumen output of the fixture. The adjustable knuckle allows for up to 50° degrees of vertical adjustment for putting the light exactly where you need it.

Each of the individual LED light engines come with 32 LEDs; for a max total of 256 LEDs. Nine optical distribution patterns are available.

A unique Type 4-A automotive distribution pattern is available for the front rows of Auto Dealerships. Available in 3000, 4000, 5000 Kelvin temperature.

A durable polyester powder coat finish is guaranteed for five years; and is available in standard or custom colors.

The **BOW LX-III LED** series is an exceptional choice for auto dealerships, shopping centers, commercial parking lots and general area lighting.

The **Lusso Collection** powered by **ARRAY** from Visionaire Lighting can elegantly compliment the daytime architecture of your space, while providing nighttime illumination that is up to task and equally as elegant. The collection consists of a wall sconce, bollard, single or twin arm post top and a beautiful pole mount. Available in two housings sizes and lumen packages up to 55,000 lumens thanks to our performance **ARRAY** LED platform. Scale and design creativity has no limits for any application.

# Lusso Medium Arm Mount

### Key Features

- Cast aluminum housing
- IP65 Housing and LED optical assembly
- 400 W Replacement
- 10 Specification Grade low glare optics
- 5,000 – 27,000 lumen packages
- 52 – 200 wattage range
- 120-277 universal Drivers, 347 & 480 voltage drivers
- 10KV Surge Protector
- 90% Power Factor
- 10 Year Electrical Warranty
- PangeaLink compatible
- Quick Mount Cleat
- Mounts to round or square pole
- 3, 5 and 7 Photocell receptacles
- 0-10V Dimming driver
- Title 24 Compliant Motion Sensor

## LUSSO ARRAY M-AM LED Specifications

Project Name: \_\_\_\_\_

Catalog Number: \_\_\_\_\_

Type: \_\_\_\_\_

Contemporary design meets the new generation of LED green technology in this stunning luminaire, the **Lusso Array**. The Lusso Array series provides over fifty percent energy savings over traditional HID light sources; and offers excellent beam control and LED life beyond 100,000 hours for 1400 milliamp systems. The Lusso Array is offered in ten optical distributions.

The Lusso Array's fully-sealed housing features an exceptionally well-designed thermal management system that provides superior heat dissipation.

The Lusso Array fixture is built with cast aluminum.

The **Lusso Array** is the perfect compliment to any university campus, business park, or walkway project where contemporary, architectural design is desired.

# *Wireless Mesh Networked Lighting Controls Platform*

No Project Too Big or Too Small...

PangeaLink is Visionaire's new wireless mesh network lighting controls and Internet of Things (IoT) software platform. We offer both 7-Pin wireless nodes and internal wireless controller options. When paired with our wireless gateway, you can turn any outdoor lighting project into a dynamic connected lighting solution that is easily accessed with our proprietary software via the cloud. Whether it's a commercial parking lot, parking garage, large campus or miles and miles of city highways and downtown cityscapes...no project is too big or too small.

01

### Controls On | Off | Dim

Easily configure your lighting & dimming profiles to maximize energy savings for your project

### Scheduling, Zones & Events

Simple creation of time and schedule based profiles, group luminaires for zonal control, create special event profiles

02

03

### Occupancy Sensing

With our fixture's integrated motion sensor options provide a safety override to your time based schedules

### Daylight Harvesting

Utilize our garage or high & low bay daylight harvesting features to dim or turn off lights when artificial light isn't needed

04

05

## Energy Monitoring

Our revenue grade energy monitoring helps to provide accurate reporting to make informed system decisions on energy consumption

## Asset Management

All inclusive asset management features lets you know exactly how many fixtures you have, the exact luminaire details and exactly where they are installed

06

## Maintenance & Alerts

Real time maintenance features and system alerts are pushed via text or e-mail so you always know the health of your system, while helping improve service efficiency

## Analytics & Reporting

Utilize our analytics & reporting functions to create standard recurring reports or run custom reports whenever necessary

08

# The Complexity of Monitoring Multiple Systems and Software

Every connected or IoT platform has its own unique log-in, software and graphical user interface. Imagine the complexity and difficulty to monitor and manage multiple systems. Also, imagine how this complexity will grow when more solutions are integrated over time.

# The Simplicity of a Single Easy to Monitor Dashboard

Thanks to Pangealink's customizable connected & IoT dashboard of "widgets", you have quick easy access to all of data in the format you'd like to see.

All of your information available in real-time.  
All from a single easy to access visual dashboard.  
All from a single software platform with a single log-in.
