

All-Round Steel Tenon Adapters are precision-fabricated from heavy-wall round steel tubing and engineered for long-term structural performance. Available with 2 $\frac{3}{8}$ " to 6" diameter tenons, these adapters provide a secure, reliable interface between luminaires and round poles.

RETA – Round External Tenon Adapter

- Designed to slip-fit over existing 3" to 5" diameter round poles
- Ensures proper fixture alignment and load distribution
- Ideal for retrofit or new-installation applications requiring external tenon mounting
- Durable steel construction supports demanding outdoor environments
