

# PRK LED Specifications

Ceiling - Garage - Canopy - Area

The PRK LED Series offers clean, functional styling that is defined by its sleek low profile design and rugged construction. It combines the latest LED edge-lit Array technology, advanced LED thermal management and provides canopy lighting that is both energy efficient and aesthetically pleasing.

The PRK housing is die-cast aluminum with internal heat sinks for maximum heat dissipation.

The PRK LED fixture offered with lumen packages between 3,000 - 15,000. Four different optical distribution patterns are available. Choose between 3K, 4K, or 5K Kelvin temperature of the LEDs.

A durable polyester powder coat finish is guaranteed for five years; and is available in standard or custom colors.

The PRK series is an exceptional choice for parking garage lighting and other ceiling mount application.

**Housing**

Die-Cast aluminum LED housing with integral cooling fins for thermal management. Silicone gasket is used for weather tight operation.

**Mounting**

A Low Profile, hinged, ceiling mount bracket, can be secured directly to a 4" or 5" recessed junction box, or to the ceiling.

A Ceiling Mount bracket with 1/2" and 3/4" knockouts is also available for surface conduit mounting.

The ceiling hangar bracket on both versions allows the fixture to be suspended while making the wiring connections. The housing bracket then attaches to the ceiling bracket via a tamper-proof screw.

3/8" NPT stem and canopy supplied for pendant mount applications.

**Thermal Management**

The PRK series provides excellent thermal management by mounting the LEDs to the substantial heat sink within the housing. This enables the Luminaire to withstand higher ambient temperatures and driver currents without degrading LED life.

**Optical System**

The highest lumen output LED are utilized. High-performance acrylic optics feature industry leading Type I, III, and V optical distributions. Light Guide Panel is impact-resistant and rated to 94 percent translucence.

L70 life of our LEDs is rated over 100,000 hours, The optical system qualifies as IES full cutoff to restrict light trespass, glare and light pollution for neighborhood-friendly lighting.

CRI values are 70.

**Quali-Guard® Finish**

The finish is a Quali-Guard® textured, chemically pretreated through a multiple-stage washer, electrostatically applied, thermoset polyester powder coat finish, with a minimum of 3-5 mils thickness. Finish is oven-baked at 400° F to promote maximum adherence and finish hardness. All finishes are available in standard and custom colors.

- Optional Zinc-Free Primer - Recommended within three miles of the ocean
- Finish is guaranteed for five (5) years.

**Electrical Assembly**

The PRK LED series accepts 120v -480v, 50 Hz to 60 Hz, input. Power factor of 90%. Rated for -40°C operations.

6 kV surge protector supplied as standard.

**Warranty**

• Five (5) year Limited Warranty on electrical components, Five (5) year on finish. For full warranty information, please visit [visionairelighting.com](http://visionairelighting.com).

**Options**

- Wattstopper Plus
- Wattstopper FSP-211 Motion Sensor/Control (Title 24 Compliant)
- Dimming Driver
- Dim To Off Driver
- 20W Emergency Battery Pack UNV Voltage Only
- 20W Cold Weather Emergency Battery Pack (Rated for -20°C) UNV Voltage Only
- UL 924 Relay UNV Voltage Only
- 10kV Surge Protector
- 20kV Surge Protector
- House Side Shield
- Visionaire Wireless Controls
  - Enables high end trim
  - Based on Zigbee wireless communication protocol
- BAA / BABA

**Listings**

- PRK is UL Listed
- IP66 Rated
- Powder Coated Tough
- Meets ANSI C136.31-2010 3G Vibration Standards (LPM & CM Only)

3000K or lower must be selected with a fixed mount for IDA certification. Fixed mount must be selected for IDA dark sky certification.

**Light Color**

Correlated Color Temperature (CCT)

## PRK LED Mounting and Options

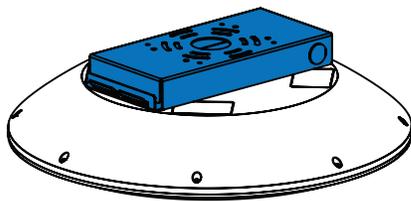

---

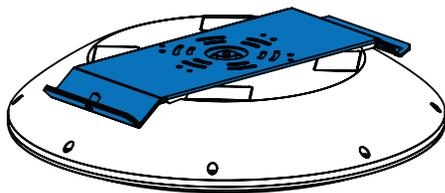

**Trunnion Mount**  
Standard and  
Tampered Screws

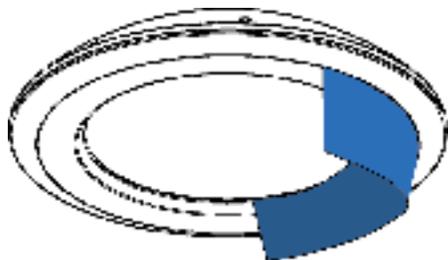

**Pendant Mount**  
3/8 and 3/4" NPT Pipe  
12, 24 & 36" Length

**Ceiling Mount**  
Standard and Tampered  
Screws

**Low Profile Mount**  
Standard and Tampered  
Screws

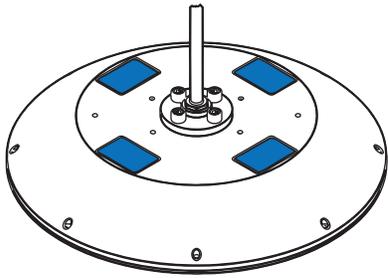

**House Side Shield**  
Strict boundary line cutoff

\*WSC options will require (1) FSIR 100 remote for programing

## WATTSTOPPER PLUS

### FSP-600 Series

The FSP-600 series by Wattstopper PLUS is an integrated luminaire level lighting controller and sensor for indoor/outdoor lighting applications that require networked wireless control. The FSP-600 is designed to integrate directly into exterior, high bay, parking garage, and general site lighting solutions. It is a passive infrared (PIR) sensor and closed loop photosensor.

The FSP-600 series design intends to reduce installer labor time and make on-site start up easy for technicians.

Once commissioned and paired to a Wattstopper PLUS network, the devices can measure both motion and daylight contribution in order to automatically switch or dim lighting. It also provides the ability to communicate to other fixtures in the space without any front-end devices.

The Wattstopper PLUS FSP-600 series is available in a few different options including: internal, external straight nipple, and external drop nipple. Sensor lens options sold separately and should be ordered based on designed mounting height and desired finish.

FSP-621

## FSP-200 Series

The FSP-200 series sensors provide multi-level control based on motion and/or daylight contribution. They control 0-10 VDC LED drivers or dimming ballasts, as well as non-dimming ballasts and, with an FSP-Lx Lens, are rated for wet and cold locations. All control parameters are adjustable via a wireless configuration tool capable of storing and transmitting sensor profiles. The FSP-200 series is available in two different voltage configurations adding flexibility to your fixture design or project.

Typically, the sensor ramps lighting On to the selected High mode level when motion is detected and the ambient light level is below the hold off setpoint. After the sensor stops detecting movement and the time delay elapses, lights fade to the Low mode level. If there is no motion during the subsequent cut off time delay, the lights will turn Off. For dusk to dawn control, the integral photocell can switch the lights On and Off based on the ambient light level so that lighting remains on overnight even without motion detection.

Initial setup and subsequent sensor adjustments are made using a Wireless Handheld Configuration Tool (FSIR-100). This tool enables adjustment of parameters including high and low modes, sensitivity, time delay, cut off and more. The FSIR-100 is also used to initiate automatic calibration of the FSP-2x1B ambient light level setpoint. The setpoint is used to hold the controlled lighting off or at a low level when there is sufficient daylight. The wireless tool stores up to six sensor parameter profiles to speed configuration of multiple sensors.

FSP-211

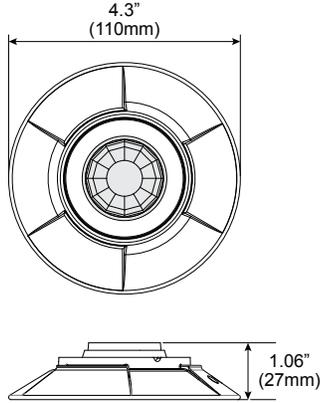

FSP-221

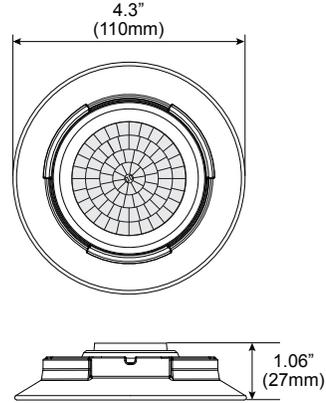

**Lens with Shroud Dimensions**

The FSP-Lx-S models include a shroud, which blocks high-angle light coming from the fixture, to improve photocell performance. With the shroud attached, the dimensions for all three lenses are identical

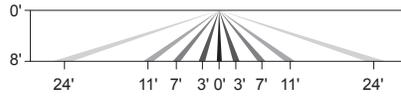

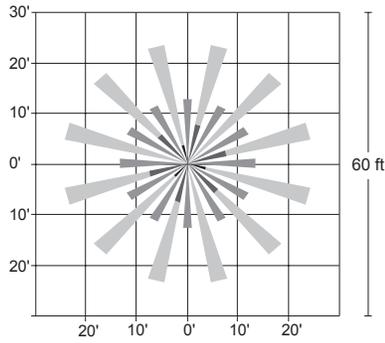

**FSP-L2-S and FSP-L3-S**

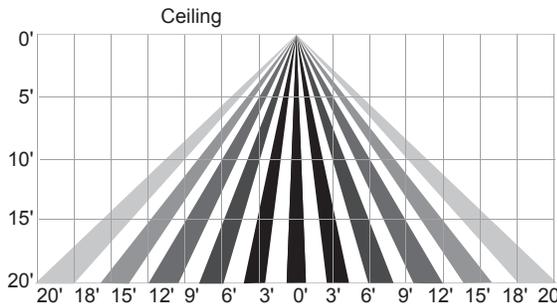

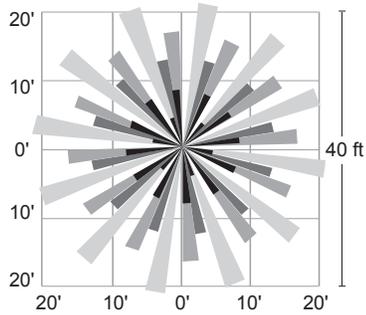

**FSP-L7-S**
