

All installation work must be performed by a qualified, certified electrician.

Caution! Disconnect all power before installation.

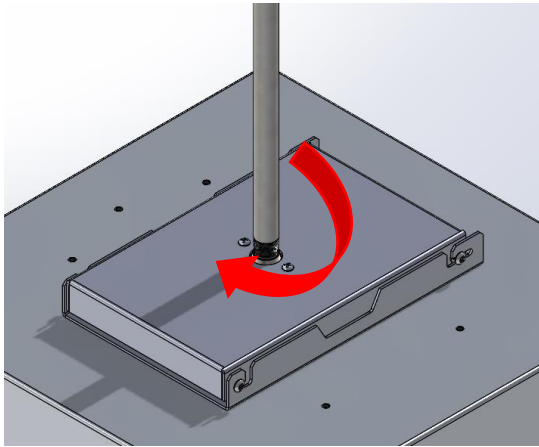

Fig. 1

BEFORE YOU BEGIN

- Read these instructions completely and carefully.
- Save these instructions for future use.

WARNING

- To avoid possible risk of fire or shock turn off power prior to installation or maintenance preferably at circuit breaker.
- Product must be installed following all NEC and local Electrical Codes.

UNPACKING

- This luminaire has been properly packaged so that no damage shall occur during transportation.
- Inspect and confirm.

INSTALLATION

- Apply thread sealant (supplied by others) completely around the external threads of the pipe and completely around the internal threads of the mounting assembly.
- Slide the power leads cable through the wire way hole and the stem and make electrical connections per NEC (the National Electrical Code).
- Tighten the pipe into the mount assembly. (Fig. 1)
- Slip the cover over the conduit and screw the pipe into the ball joint and secure it in place using the set screw. (Fig. 2)
- Install the mounting bracket using 2 #8 screws. Mount the pipe assembly into the bracket. (Fig. 3 & 4)
- Final Assembly (Fig. 5)

Note: Not to scale, for reference only.
